

iDESIGN FABRICATIONS

Steel Run, Gate and Run Roof Panels

iDesign steel galvanised run and gate panels are completely hand made in the UK by our specialist fabricator... no cheap, mass machine made imports from Europe.

Offering a range of sizes plus completely custom steel work for your every need.

Steel panels can be either 5cm bars, 2" heavy gauge mesh, 1" mesh, solid steel sheeted or infilled with our premium HDPE coloured infills – all completely bespoke if required!

With the option of extra locks, keyed locks and everything in between to make sure our panels are safe and secure. If you have an idea that you would like to incorporate such as stable/control gates, puppy gates and the like- get in touch!

Runs/Gates up to 2m: £185 (+VAT)

Runs/Gates 2m-2.5m: £195 (+VAT)

Runs/Gates 2.5m-3m: £205 (+VAT)

Runs and gates over 3m long would need to be made in 2 panels. Panel heights can be up to 2m tall. Taller panels will have a small surcharge. Bespoke width sizes made to the mm* at no extra cost!

Optional Extras

Lockinox keyed handle: +£135 (+VAT)

Extra padbolt: +£15 (+VAT)

Puppy/stable/control gate: +£30 (+VAT)

HD Coloured infill: £ dependant on size of panel

External Run Roofing

At iDesign we only use premium products to create the perfect kennel system. All our box profile run roofs come with DR!PSTOP as standard (unless asked otherwise) to negate pesky condensation at certain times of the year!

The **DR!PSTOP** solution: Roof panelling with DR!PSTOP applied provides a medium for trapping this moisture in the specially designed pockets formed in the membrane . DR!PSTOP holds that moisture until conditions go back below the dew point and it is released back into the air in the form of normal humidity.

The cost for run roofs depends on the length and width of the area covered. For instance, a 1.5m x 2.5m covered run would work out at £180+VAT.
